Chemical Properties

CAS	22571-95-5
Formula	C ₂₀ H ₃₁ NO ₆
MW	381.46
Storage	Please store the product under the recommended conditions in the Certificate of Analysis.
Structure	 <p>The chemical structure of Symphytine is a complex molecule. It features a central bicyclic system consisting of a pyrrolidine ring fused to a cyclopentene ring. Attached to the pyrrolidine ring is a side chain containing a ketone group and a double bond. Another side chain is attached to the cyclopentene ring, featuring a carboxylic acid group and a chiral center. The chiral center is labeled 'Chiral' and has a hydroxyl group and a methyl group attached to it. The structure is shown with stereochemistry, including wedged and dashed bonds to indicate the three-dimensional arrangement of atoms.</p>
Purity	>98%
